Jumpfree

ASSEMBLY, SAFETY, CARE AND MAINTENANCE,
USE, AND INSTRUCTIONAL MATERIALS ENCLOSED.

WARNING: USING THIS TRAMPOLINE EXPOSES YOU TO THE RISK OF SERIOUS INJURY**,** INCLUDING PERMANENT PARALYSIS OR EVEN DEATH FROM LANDING ON THE BACK, NECK OR HEAD. THIS RISK EXISTS EVEN IF YOU LAND ON THE TRAMPOLINE MAT (BED). READ THIS MANUAL AND ALL MATERIALS FURNISHED WITH THE TRAMPOLINE THOROUGHLY BEFORE ASSEMBLING OR ALLOWING ANY PERSON TO USE THE TRAMPOLINE.
RETAIN THIS MANUAL FOR FUTURE REFERENCE.

BEFORE YOU BEGIN

Thank you for selecting a Jumpfree Star Trampoline.

The **Jumpfree Star** is designed and crafted to provide you and your family with many years of fun and fitness.

For your benefit and safety: read this manual carefully before using this trampoline. Refer to page 30 for a description and assembly location of trampoline parts and accessories that are described in this manual.

ATTENTION

	Do not land on head or neck. Paralysis or death can result, even if you land in the middle of the mat. To reduce the chance of landing on your head or neck, do not do somersaults (flips)!		Only one person at the time on the trampoline. Not recommended for children under six years of age. Multiple jumpers increase the chances of loss of control, collision and falling off. This can result in broken head, neck, back or leg.

Misuse and abuse of this trampoline is dangerous and can cause serious injuries.
Trampolines are rebounding devices which propel the performer to unaccustomed heights, and into a variety of body movements. Rebounding off of the trampoline, striking the frame or springs, or improperly landing on the trampoline mat (bed) may cause injury.
Read all instructions thoroughly before using this trampoline, or allowing its use by any person.
Inspect the trampoline before each use, and replace any worn, defective or missing parts.
All purchasers and all persons using the trampoline must become familiar with the manufacturer's recommendations for the proper assembly, use and care of the trampoline. Each user must also be alert to his or her own limitations in the execution of trampoline skills. Assembly instructions, selected precautions, recommended instructional techniques and progressions, and suggestions for the care and maintenance of the trampoline are included in this user's manual to promote safe, enjoyable use of this equipment.
It is the responsibility of the owner or trampoline supervisor to insure that all users of this trampoline are adequately informed of all warnings and safety instructions.

TRAMPOLINE SAFETY INFORMATION

NEED FOR TRAMPOLINE SAFETY

In trampoline use, as with all active recreational sports, participants can be injured. There are steps you can take to reduce the risk of injury. In this section (continued on the next page), the primary accident patterns have been identified and the responsibilities of the supervisors and the jumpers in accident prevention are described.

ACCIDENT CLASSIFICATION

- **Somersaults (flips):** Landing on your head or neck, even in the middle of a trampoline mat (bed), increases the risk of a broken back or neck, which can result in paralysis or death. Such events can occur when a jumper makes an error trying to perform a forward or backward somersault (flip). Do not do somersaults (flips) on this backyard trampoline.
- **Multiple Jumpers:** More than one jumper on the trampoline increases the chance of someone becoming injured by losing control of their jump. Jumpers may collide with one another, fall off the trampoline, fall on or through the springs, or land incorrectly on the mat (bed). The lightest weight jumper is the most likely to be injured.

- **Mounting and Dismounting:** The trampoline mat (bed) is several feet from ground level. Jumping off the trampoline to the ground or any other surface may result in injury. Jumping onto the trampoline from a roof, deck, or other object also represents a risk of injury. Smaller children may need assistance getting up on or down from the trampoline. Climb carefully on and off the trampoline. Do not step onto the springs or the frame pad. Do not grasp the frame pad to pull yourself onto the trampoline.
- **Striking Frame or Springs:** Injury may result from encountering the frame or falling through the springs while jumping or getting on or off the trampoline. Stay in the center of the trampoline mat (bed) when jumping. Be sure to keep the frame pad in place to cover the frame. The frame pad is not designed -nor intended to support the weight of the trampoline user. Do not step or jump directly. onto the frame pad.
- **Loss of Control:** Jumpers who lose control of their jump may land on the mat (bed) incorrectly, land on the frame or springs or fall off the trampoline. A controlled jump is one where the landing is in the same spot as the take off. Before learning a more difficult jump, the preceding one should be performed consistently under control. Attempting a jump beyond present skill levels increases the chance of loss of control. To regain control and stop your jump, bend your knees sharply when you land.
- **Alcohol or Drug Use:** The chance of injury increases when a jumper has consumed alcohol or taken drugs. These substances impair a person's reaction time, judgment, and physical coordination.
- **Encountering Objects:** Use of a trampoline while other people, pets, or objects are underneath it will increase the chance of injury. Jumping while holding or having an object on the trampoline, particularly one that is sharp or breakable, will increase the chance of injury. Placing a trampoline too close to overhead electrical wires, tree limbs, or other obstructions can increase the chance of injury.
- **Poor Maintenance of Trampoline:** Jumpers may be injured if a trampoline is used when it is in poor condition. A torn mat (bed), bent frame, broken spring, or a missing frame pad, for example should be replaced before anyone is allowed to jump. Inspect the trampoline before each use.
- **Weather Conditions:** A wet trampoline mat (bed) is too slippery for safe jumping. Gusty or severe winds can cause jumpers to lose control. To reduce the chance of injury, use the trampoline only under appropriate weather conditions.
- **Limiting Access:** To prevent access to the trampoline by unsupervised small children the access ladder should always be removed and stored in a secure location when the trampoline is not in use.

TRAMPOLINE SAFETY INSTRUCTIONS

- Do not use the trampoline when under the influence of drugs or alcohol.
- Learn fundamental jumps and body positions thoroughly before trying more advanced skills.
- Review the User's Manual to learn about how to do basic jumps.
- Stop your bounce by flexing your knees as your feet come in contact with the trampoline mat (bed).
- Avoid jumping too high or for too long. Always control your jump. A controlled jump is one where the take off and land spots are the same.
- Focus your eyes on the trampoline mat (bed). Failure to do so may result in a loss of balance and control.
- Take turns jumping one at a time, and always have someone watch you.
- Climb on and off the trampoline. Do not jump on or off. Do not use the trampoline as a springboard to other objects.
- For further information or additional instructional materials, contact a certified trampoline instructor.

TRAMPOLINE PLACEMENT

- A minimum of 7.3 meters of overhead clearance is required. Adequate horizontal clearance must be maintained from objects and possible hazards including electric power wiring, tree limbs, recreational structures (swing-sets, swimming pools), and fences.
- The trampoline must be placed on a level surface before use.
- There must be no obstructions beneath the trampoline.
- Do not place the trampoline near any other recreational devices or structures such as a swimming pool or swing-set.

.

ASSEMBLY

For assembly instructions please turn to page 21, 22, 23
Use gloves to protect your hands from pinch points during assembly and disassembly

CARE AND MAINTENANCE

CARE

Do not allow family pets on the trampoline, as claws may snag and pull the mat (bed) material or damage the frame pad.
The trampoline is intended to be used by one person at a time. The user should be either barefoot, in socks, or wearing gymnastic shoes. Street shoes or tennis shoes should not be worn on the trampoline. The user should remove all sharp objects from their person which may cause injury or damage to the trampoline mat (bed). Heavy, sharp or pointed hard objects should not contact the mat (bed) surface.

MAINTENANCE

Your trampoline is manufactured using quality materials and is finely-crafted to provide you and your family with many years of enjoyment and exercise. Proper maintenance and care will help to prolong the life of the trampoline and reduce the possibility of injury. The following guidelines should be observed at all times.
Inspect the trampoline before each use, and replace any worn, defective or missing parts. The following conditions present potential hazards and increase the danger of personal injury:

- Punctures, holes or tears in the trampoline mat (bed).
- Deterioration in any stitching of the mat (bed).
- Bent or broken frame or legs.
- Broken or missing springs.
- Missing or insecurely attached frame pad.
- Sagging jumping mat (bed).
- Sharp protrusions on the frame or suspension system.

IF ANY OF THESE CONDITIONS EXIST, THE TRAMPOLINE SHOULD BE DISASSEMBLED OR OTHERWISE PROTECTED AGAINST USE UNTIL THE CONDITION IS PERFECT.

The trampoline can be damaged by extreme heat. Keep the trampoline away from fire and other heat sources. Never use abrasives or detergents to clean the trampoline. This cleaning products can damage the trampoline therefore only clean the trampoline with clear water.

SPECIAL CONSIDERATIONS

Wind

It is possible for the trampoline to be blown about by a high wind. If you anticipate high winds, the trampoline should be moved to a sheltered location, disassembled, or the round outside portion (top frame) should be tied to the ground using rope and stakes. At least three tie-downs should be used.(DO NOT FORGET TO REMOVE THE STAKES BEFORE YOU START JUMPING AGAIN!!) Do not simply secure the legs to the ground, as they can pull out of the frame sockets.

Moving the trampoline

If you need to periodically move your trampoline all slip joints should be secured with a weather resistent tape (i.e. tape). This will keep the frame intact and prevent the tubular elements from separating during the move. The trampoline should be moved by at least two people, kept horizontal, and lifted slightly. Then pull on the trampoline. Disassemble the trampoline for any other type movement (see disassembly)

LIMITED WARRANTY

Steel frame	**3 years**
Springs	**1 year**
Jumping bed	**2 years**
Safety pads	**1 year**

The trampoline parts are warranted against defects and workmanship only. Misuse or abuse of the trampoline make all guarantees invalid.

TE Avyna is not responsible or liable for indirect, special or consequential damages arising out of or in connection with the use or performance of the product or other damages with respect to any economic loss, loss of property, loss of revenue or profits, cost of removal, installation or other consequential damages

OPGELET!!
De beschermingsrand is uit een stuk gemaakt en moet zowel het kader en de veren bedekken. Het kussen wordt met linten vastgemaakt.
U wordt sterk geadviseerd ten alle tijden een beschermingsrand over de veren te gebruiken als u springt. ***Het is echter niet gemaakt om op te zitten, staan, kruipen, of als landingsbaan te gebruiken. Dit zal de levensduur van de beschermingsrand enorm verkorten!!***

CAUTION!!
Use of this trampoline is not recommended without the frame pad, which is designed to reduce the likelihood of injury to the user from coming into contact with the frame of the trampoline. If you do not have a frame pad, contact your dealer to obtain a frame pad. Properly install the frame pad before using the trampoline.
These safety pads are designed to prevent contact with the steel frame. They are soft enough to absorb the impact of an "emergency landing" and as durable as possible to withstand all weather conditions. ***The pads are not indestructable so do not sit, stand, lie or bounce on them.***

ATTENTION !!
Nous recommandons de ne pas utiliser ce trampoline sans le rembourrage du cadre qui a été congu pour réduire les risques de blessure á l'utilisateur en cas de contact avec le cadre. Si vous n'avez pas de rembourrage, contactez le magasin pour en obtenir un. Installez le rembourrage correctement avant d'utiliser le trampoline.
Le rembourrage est fabriqué pour le securité en cas d'un "atterissage forcé". Il n'est pas indestructible, donc faites attention pas d'être assis, ou rebondir sur le rembourrage.

ACHTUNG:
Dieses Trampolin solite nicht ohne die Rahmenmatte benutzt werden. Sie ist dazu da, die Verietzungsgefahr durch Kontakt mit dem Trampolinrahmen zu verringern. Soliten Sie keine Rahmenmatte besitzen, wenden Sie sich an Ihren Händier, urn eine zu erwerben.
Vor der Benutzung des Trampolins solite die Rahmenmatte richtig installiert werden.
Die Rahmenmatte ist nur gemacht für Notlandungen, so Sie sollte es nicht benutzen zum Sitzen, Liegen oder Springen.
